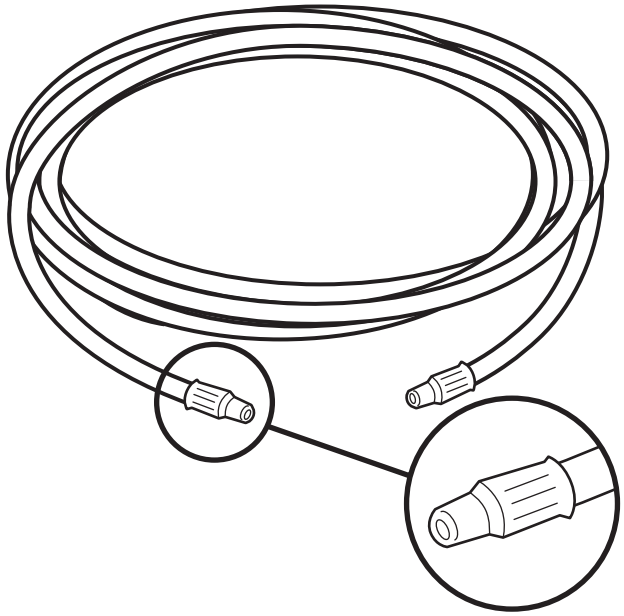
# Installation

## 1 Cleaning the air hose

- □ A 3/8" air hose is required, with a maximum length of 25 ft.
- □ Clean the air hose of accumulated dust and moisture before connecting it to the air supply.

**NOTE:** If a longer air hose is required, connect a 1/2" air hose to the 3/8" air hose to ensure the ratchet wrench has the necessary air supply.



## 2 Connecting to the air supply

- □ Always use clean dry air. Excessive moisture and dirt will greatly reduce the life of any air motor. We recommend the installation of an in-line filter-regulator-lubricator as close to the tool as possible.
- □ Ensure all hoses and fittings are the correct size and secured tightly.

| Recommended Air Line Set-Up | |
|---|---|
| **Part** | **Description** |
| A | 3/8” Ratchet Wrench |
| B | Quick Plug |
| C | Quick Coupler |
| D | Air Hose |
| E | In-line Regulator |
| F | In-line Lubricator |
| G | In-line Filter |
| H | Air Compressor |
